

Ade Febri Syah Putra

DevOps Engineer | Pipeline Data Engineer
Jakarta Timur, Indonesia | 0812 1354 8613 | ads.febri7998@gmail.com

PERSONAL INFORMATION

Place and Date of Birth: Jakarta, February 5, 1998
Address: Jl. Kelapa Gading 3 RT 10 RW 01 No. 22, Kramat Jati, Jakarta

PROFESSIONAL SUMMARY

DevOps Engineer with 4+ years of experience in designing and maintaining CI/CD pipelines, automating deployment processes, and managing IT infrastructure. Skilled in tools such as Kubernetes, Jenkins, Docker, and Terraform, with a proven ability to streamline processes and improve system efficiency. Strong collaborator with development teams to achieve faster, more accurate application releases.

TECHNICAL SKILLS

- Programming Languages: Python
- Database & Storage: Kafka, MongoDB, Postgresql
- Monitoring & Alerting: Grafana, Elasticsearch, Kibana, Create TelegramBot for alerting and monitoring
- CI/CD & DevOps Tools: Kubernetes, Jenkins, Docker, ArgoCD, Terraform, SonarQube

PROFESSIONAL EXPERIENCE

Big Data and AI Company, Ebdesk Teknologi
DevOps and Pipeline Data Engineer **Oct 2020 - Jun 2024**

- Implemented CI/CD pipelines using Git, Terraform, Jenkins, Docker, and ArgoCD, enhancing deployment accuracy and speed.
- Developed Python scripts for monitoring system health, automating maintenance, and improving incident response.
- Created and managed alert systems via TelegramBot to provide real-time monitoring and updates.

Big Data and AI Company, Ebdesk Teknologi
Team Lead DevOps and Pipeline Data Engineer **Jul 2024 - Feb 2025**

- Led DevOps and SRE team to maintain reliability, scalability, and availability of production systems.
- Designed and enforced best practices for CI/CD, infrastructure automation, and monitoring.
- Coordinated incident response and root cause analysis to improve system reliability.
- Collaborated with engineering teams to improve deployment workflows and system observability

Adhimix Precast Indonesia
Data Engineer | Data Integration Specialist **Mar 2025 - Present**

- Designed and operated real-time CDC data pipelines integrating PostgreSQL, Odoo, and BigQuery using Debezium, Apache Kafka, and Kafka Connect.
- Managed Kafka-based streaming infrastructure including KRaft cluster configuration, topic management, connectors, and schema registry.
- Improved pipeline reliability, observability, and troubleshooting processes, collaborating with backend teams and documenting architecture and operational SOPs.

PROJECT

Media And Social Media International Monitoring and Analytics (BIN Pejaten) **Oct 2024**

- Created deployment services for the backend, frontend, as well as required databases and storage such as MongoDB, RabbitMQ, Redis, and MinIO.
- Developed a pipeline to stream data from our office server to the client's server via RabbitMQ.
- Created application implementation documentation and presented it to the client.
